RACER SERIES

9 specialized models tailored for the beginning sculler to top-level competitors.

Flyweight to Heavyweight - **Mahogany Classics to Advanced Composites** – Each Levator is hand built by Jürgen Kaschper.

Jürgen has boat building in his blood, dating back more than six generations through his family's ancestry in Eberbach, Germany where many people to the present derive their livelihood from the Neckar River. In 1972 at the age of 16 he began his formal training at Kaschper Racing Shells in Lucan, Ontario under the direction of his father, Jakob.

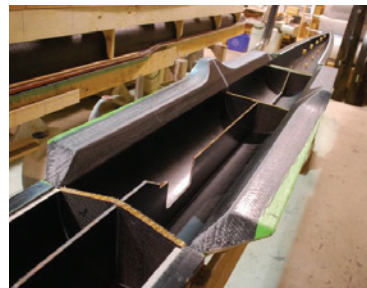

“I like what I do.”
 – Jürgen Kaschper

Personal Racer

Designed to meet individual needs. This is Your boat. Faster! Stronger! Lighter! The Personal RACER is an exceptional value. Outfitted with the best rigging and hardware providing every adjustment. Built with aerospace materials for racing to win!

We took the boat out today in flat morning water in the Marina. The boat is great! Both my daughters rowed and we really enjoyed ourselves. Very responsive and glides very smoothly. We had brought dry clothes just in case but no one went swimming, we balanced through wakes and it was not difficult to balance the boat. Thank you! Thanks for a great boat.

StandardRacer

Standard Racer

The Standard RACER will withstand the daily bump and grind of club rowing, whether competitive or recreational. This responsive boat has the required toughness to meet the on water demands of the most intensive club program.

I wanted to convey the joy I get from my daily rows on the Racer and thank you for your craftsmanship. Very few inanimate objects rival the pleasure I derive from tooling around in the shell.

BasicRacer

Basic Racer

The essential single, the Basic RACER is a top quality racing shell to start your sculling experience.

I wanted you to know that I am totally satisfied with my 'new' single -- it's exactly what I needed. BTW, it feels very familiar -- no break in time for me! I especially appreciate your extra effort in installing the strokecoach wiring. I must admit, on my little puddle of a lake, reviewing numbers will play a big role in keeping me from getting bored!!
